

SUMMARY

"Strategic Senior Software Engineer focused on building robust PHP Laravel applications for the e-commerce and logistics sectors. Highly skilled in full-stack development using the TALL stack and React, with expertise in managing complex order-tracking logic and third-party API integrations. Passionate about system optimization, database integrity, and delivering high-quality, reusable components. I thrive in fast-paced environments like SIDEUP, where technical excellence and innovative logistics solutions are key to market success."

TECHNICAL SKILLS

- Backend Development: PHP, Laravel (Expert), MVC Architecture, Clean Code Principles.
- Database Management: Advanced SQL, Database Design, Query Optimization, Data Integrity.
- API Architecture: Building and Consuming RESTful APIs, Third-party API Integration, Sanctum Authentication.
- Frontend Development: React.js, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS.
- State Management & UI: Redux, Framer Motion (Animations), Responsive Design, Localization (Bilingual Support).
- DevOps & Tools: Git Version Control, CI/CD Pipelines, Software Development Life Cycle (SDLC).

PROFESSIONAL & SOFT SKILLS

- System Scalability: Building modular design patterns for maintainable and scalable applications.
- Critical Thinking: Strong analytical mindset for evaluating complex problems and optimizing workflows.
- Problem Solving: Experienced in debugging, troubleshooting, and resolving performance issues across full-stack systems.
- Collaborative Teamwork: Effective communication for articulating technical concepts and contributing to code reviews.
- Adaptability: Ability to quickly adapt to new technologies and regulatory standards.

KEY PROJECTS

- 1. Ecomers_Laravel (Full-Stack E-commerce System)**
 - Description: Developed a robust e-commerce platform featuring complete product management, user authentication, and order tracking.
 - Key Tech: Laravel (MVC), MySQL, RESTful APIs, and integration with dynamic front-end interfaces.
 - Impact: Implemented modular design patterns to ensure high scalability and maintainability of the application.
- 2. Larastart (API & Logic Lab)**
 - Description: A specialized project focused on mastering backend logic, including advanced middleware and secure API integrations.
 - Key Tech: PHP Laravel, Authentication Guards, and custom Middleware layers.
- 3. Interactive Portfolio & State-Managed Apps**
 - Description: Built visually engaging web applications emphasizing seamless user experience and complex state management.
 - Key Tech: React.js, Redux Toolkit, and Framer Motion for high-quality animations.

EDUCATION

- Bachelor of Management Information Systems (MIS)** | Abbassia Institute | 2017 – 2021.
- Diploma in Web Design and Development (Fullstack)** | MEC Academy | 2023 – 2024.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer | Freelance | 2024 – Present

- Architecting and delivering high-performance, responsive web applications using React.js, Tailwind CSS, and Laravel.
- Implementing complex state management solutions with Redux Toolkit and enhancing user engagement through Framer Motion animations.
- Designing and integrating RESTful APIs, ensuring seamless data synchronization between frontend interfaces and backend logic.
- Managing end-to-end workflows using Git version control and establishing CI/CD pipelines for optimized deployment.

Back-End Developer | Grand Company | 2021 – 2022

- Engineered scalable backend systems utilizing PHP Laravel and MVC architecture, adhering to clean code and SOLID principles.
- Optimized database performance by applying advanced SQL techniques, ensuring data integrity and efficient query execution.
- Developed a comprehensive E-commerce platform (Ecomers_Laravel), managing product lifecycles, complex authentication, and real-time order tracking.
- Built and secured API integrations, focusing on custom middleware and robust authentication protocols (Sanctum/JWT).
- Collaborated in agile team environments, contributing to code reviews and implementing modular design patterns to ensure maintainability.

Front-End Developer Trainee | MEC Inc. | 2022 – 2023

- Developed dynamic user interfaces with React.js, focusing on component reusability and performance optimization.
- Built responsive applications using HTML5 and CSS3, ensuring cross-browser compatibility and mobile-first design.
- Deployed key projects including a professional portfolio and a state-managed task application to demonstrate UI/UX proficiency.
